Lancaster Farming

VOL. 10 NO. 34 | Lancaster Farming, Saturday, July 24, 1965 | $2 Per Year

TOM ZARTMAN, EPHRATA R1, a candidate for the County Star Farmer degree is shown with one of his seven sows, all of which are about to farrow. Tom is a member of the Cloister FFA Chapter, and plans to specialize in livestock production after graduation next year from Ephrata High School.

L. F. Photo

Tom Zartman Anchors His Farming Future Solidly In Livestock Production

(Editor's Note: This is a continuing series featuring the five FFA boys who are competing for the County Star Farmer degree).

Any 16-year-old farm boy who can build an ownership equity of approximately $7,000 in four years has to be on the right track! That is what Thomas Zartman of Ephrata R1 has accomplished since he began taking livestock production seriously shortly before he entered high school The present value of his fully-owned equipment and livestock, including 3 steers, 1 Angus heifer, 5 acres of corn, 6 acres of barley, 5 acres of alfalfa, 7 sows (all about to farrow), and 25 market hogs, gives him a sizable stake in the expansion he plans for his hog operation

Either this fall or next spring, Tom hopes to build a modern farrowing house. He expects to double the size of his sow herd, and eventually add a finishing house so that he can feed out all his market hogs.

Tom is the son of Mr. and Mrs Ira Zartman Mr. Zartman and Tom run the 72-acre farm together In some cases there is a clear-cut division of enterprises; in others they work on halves Mr Zartman also works off the farm hauling hay and straw with his trailer truck

Young Zartman is a senior at Ephrata High School where

Conservation Directors Meet With County Planners To Study Trends Influencing The Future Of Farming

The Lancaster County Soil and Water Conservation District directors met this week in an informal discussion with the County Planning Commission director Ellis Harned at the County Office Bldg. on East King Street

The purpose of the get-together was to help the conservationists to better understand the effects of industrial and population growth in the county during the past decade, and by examining the trends, to better predict the direction of this farm-devouring expansion.

To that effect, Planning Director Harned reviewed numerous charts, tables, and maps for the district representatives. In discussing population growth, for example, Harned showed that from 1920 1950 population remained nearly constant, but from 1950-1960 it began to boom. During that period a population growth of 18 percent made us the fastest growing standard metropolitan area in the state The greatest growth occurred in the township areas, with the City actually losing population In projecting housing expansion, Harned predicted the greatest expan-

2nd Phase Of Ohio 4-H Exchange Prog. Begins

As part of the continuing exchange 4-H program aimed at encouraging a better understanding among youth of people and problems in other states and areas, four 4-H'ers from Ohio recently completed a week's stay with county members They returned to Ohio on Sunday, July 18

The second phase of this exchange program will begin July 26 when the 4-H'ers who hosted the Ohioans will travel to Ohio by car for a reciprocal visit.

The members who will make the trip are: Janice Keeney, Village Drive, Neffsville; Averril Royer, 2025 Oregon Pike, Lancaster; Gerald Wagner, Quarryville R2; and Barrett Borry, Mount Joy R1

Dutch Days And Poultry Festival To Brighten Aug.

The Pennsylvania Poultry Federation will be host to thousands during the week of August 24-29, as it holds its 1965 summer festival at Hershey The schedule of activities includes a statewide chicken barbecue, selection of the 1965-66 Pennsylvania Poultry Queen, a Bantam Show, and several educational features.

The festival will be held in Hershey Park, 12 miles east of Harrisburg It is held annually in conjunction with Pennsylvania Dutch Days, a popular folk celebration, and this year comes during a week of special agricultural events:

Meeting Planned For Vegetable Growers July 29

A meeting of Lancaster County vegetable growers will be held Thursday, July 29, at 6 30 p m at the Penn State University Southeastern Field Research Farm near Landisvlile, to observe sweet corn varieties in test plots

A total of 58 commercial and experimental varieties were planted in 50-foot, replicated rows Early, mid-season, and late varieties are included Nine of these are white corn

Arnold Lueck, associate agricultural agent, states that this is an excellent trial, and he urges all vegetable growers to attend this twilight meeting.

Vegetable specialist from Penn State, J. O. Dutt, will be on hand to discuss the tests. Yield data on some of the early varieties will be available.

Further Spots Filled For All American Show

Ten prominent farmers and as many dairy educationists were named to top roles in the Sept. 13-17 second Pennsylvania All-American Dairy Show.

State Secretary of Agriculture Leland H. Bull said the show, an outstanding event at its introduction a year ago, will be held in the State Farm

Hunter Gets A Specialist Post At State Level

State Secretary of Agriculture Leland H Bull has announced the appointment of Ralph W. Hunter, Harrisburg, a pioneer conservationist, as program specialist in the State Soil and Water Conservation Commission.

For 30 years, starting in 1935, Hunter had been with the Soil Conservation Service, U. S. Department of Agriculture, most recently as area conservationist in charge of a 17-county southeast Pennsylvania region.

He did soil erosion control work in Indiana county, advanced to project agronomist on the Beaver Run demon-

PA. CATTLE ON FEED UP

Pennsylvania cattle feeders had an estimated 50,000 cattle and calves on grain feed for slaughter market on July 1, or 7,000 more than a year ago, according to the Pennsylvania Crop Reporting Service

There were 35,000 fed cattle marketed during the April 1-June 30 quarter, 8 percent less than were marketed during the same quarter a year earlier. Feeders placed 18,000 on feed during the quarter compared with 12,000 a year earlier

Expected marketings of 29,000 fed cattle during the coming quarter, if realized, will be 2,000 more than for the same period in 1964

PURINA MICRO-MIXING...

Your assurance of uniform, quality Chows

Feed manufacturing becomes more complex every year and requires more precise machinery and painstaking care. Many essential ingredients in quantities as small as a thimbleful per ton must be mixed thoroughly throughout a batch of feed.

You can be sure that your birds or animals get just the right amount of ingredients they need in every mouthful when you feed Purina Chows. Purina's exclusive Micro-Mixing process blends exact amounts of essential ingredients through every sack or bulk load of Chows.

Micro-Mixing protects poultry and livestock from getting too much or too little of the tiny, but vital, ingredients in today's Chows . . . helps you avoid waste and increase feeding efficiency.

Micro-Mixing is another "extra" you get when you feed from the Checkerboard bag.

PROVE TO YOURSELF...PURINA FEEDING CAN COST YOU LESS

From Where We Stand . . .

WANTED! FARMERS — Alive, Not Dead!

Do you think of farming as a dangerous occupation? If you don't, then perhaps you are one of the extra careful ones who doesn't have accidents on his farm because he avoids setting-up accident-producing situations. If you are in that very small group, we congratulate you!

But chances are you are in the majority group, even though you may not realize it. Figures show that farming accounts for more occupational deaths each year than any other single industry in the United States. In fact, agriculture is the only major industry to show a gradual increase in injury and death per number of workers during the past 15 years During 1964, 2400 men and women lost their lives while working on U. S. farms. And fatal accident figures comprise only a small portion of the total injuries sustained For every fatal accident there are probably 100 serious, crippling injuries sustained, according to the National Safety Council.

This is a grim subject to talk about on a nice summer's day, but not talking about it isn't going to make it go away, is it? And with Farm Safety Week being "celebrated" next week perhaps this is a good time to start a campaign on **your** farm that will protect you and your family throughout the year It is up to each individual farm family, you know, to safety-proof its own farm There is no government agency to come around to force you to do it — thank goodness!

Danger on the farm lurks in many forms — machinery, electricity, chemicals, fuels, structural weaknesses in buildings, debris and other booby-traps around the farmstead A general cleanup campaign might be a good place to start. Old bits of baling wire, broken glass, rusty nails, rickety stairs, loose boards, etc.

This time of year the greatest danger may be the tractor and other pieces of heavy machinery you operate from dawn to dusk, or longer. The power-takeoff unit is one real hazard in tractor operation, especially when the shield provided by the manufacturer is left hanging in the equipment shed where it can't help anyone Some farmers still operating the pull-type corn pickers are in peril when they get down off the tractor to remove a clog from the picker's moving parts without first turning off the machinery.

A tractor can also kill by bucking a rider off its back right into the path of following equipment These riders are usually children who wanted to ride along to "help Daddy work" Unless children are old enough, and are actually operating the tractor, they should be kept away from the site of field work There was one child killed in the county this week by a tractor we understand, in spite of the fact the father had apparently taken every precaution to be certain the children were out of the way.

Some accidents are going to happen regardless of precautions, but so many could be avoided if each farmer would systematically develop a safety program for his farm, and would educate the rest of the family to follow it, allowing no deviations. The few seconds sometimes saved by grabbing the wrong tool for the job just because it's handy, or by just plain thoughtlessness, can be the most costly few seconds of your life — and perhaps your last!

What Do YOU Think?

★ ★ ★ ★

Great Grandma Was About 25 Percent Clothes

Assuming Great Grandmother was a lady of the Victorian era, one of her biggest — and heaviest — problems was clothes. According to the Maytag Encyclopedia, ladies prior to the turn of the century wore as much as 40 pounds of clothing. The fashion of that day called for a wasp-waist, bustled in the back. To achieve this magnificent effect, the ladies wore whalebone corseting, bustle-padding, petticoats and dresses that weighed altogether about 40 pounds!

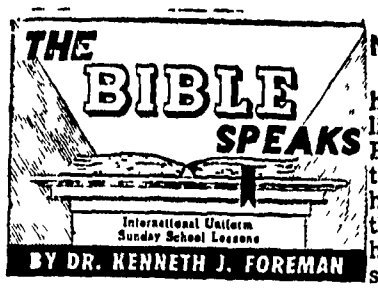
No wonder washday earned its present ugly reputation. Although conditions may not have been quite so primitive in those relatively recent times to require the beating of clothes on rocks down by the creek, at least not in the towns and cities, neither were there any fancy automatic washing machines. The encyclopedia tells us the job was done outdoors, usually in a kettle of boiling water. A clothesline, fence, or bushes were used for drying.

Now these old gals didn't have any of the jingle-singing, do-it-all detergents that modern housewives depend on They used such materials as lye soap (usually homemade) shaved into flakes in the washwater, starch, bluing, a flour-and water — plus — "elbow grease" compound for dirty spots, and a broomstick for stirring and retrieving garments from the bubbling kettle Wow!

And today? Well, the report suggests that the modern American woman may not wear much more than two pounds of clothing — including foundation garments, dress and shoes. And instead of spending a full day at laundering as her Great Grandmother did, she averages less than one hour now.

While this general comparison is interesting, and undoubtedly true to some degree, it probably doesn't help the farmwife too much She still has to spend — if not full time — at least more than an occasional hour in keeping Dad, herself and the kids in clean clothes But she seems to be gaining — perhaps in another 100 years the job really will be reduced to one hour!

★ ★ ★ ★



The Book to Study

Lesson for July 25, 1965

Background Scriptures: Acts 17 10-12; Romans 15 4-6, I Timothy 4 13-16; II Timothy 3 10-17.
Devotional Reading: Psalm 119.33-40.

THERE ARE egg-head religions, but Christianity is not one of them. There are, to be sure, some things in Christian theology which only egg-heads can understand. There are also some things in Christian experience which even an egg-head cannot understand.

Dr. Foreman

But the main feature of Christian life is being and doing rather than merely knowing. Very seldom is knowing praised or recommended in the Bible for its own sake. The general viewpoint of the Word of God is expressed in a phrase out of a long tradition: "Truth is in order to goodness." Not that knowing is unimportant! Ignorance never was a virtue, and it can be quite dangerous for all concerned.

The Religion of a Book

We may well be grateful that Christianity is the religion of a book. Not the only one of that kind; there is not one of the great religions of the world which does not have its own book. (By the way, if you want to compare religions, why not compare their sacred books? You will likely come back with relief and gratitude to the religion of the Bible.) The point here is that if this is true, if we Christians are taught to listen for the voice of God in our Scriptures, then there is no substitute for knowing what the Scriptures say and what they mean. The Bible is not a specialist's book, though specialists help us all to understand it. It is not a book for preachers only, though as teachers and preachers of the Bible ministers ought to have special skill in interpreting and using the Bible. This book is for every one.

Not like ordinary books

Those who best know the Bible have discovered that it is not like any other book. As J. B. Phillips, a modern translator of the Bible into everyday English, has said, working intimately with the Bible is like repairing an old house and suddenly getting a shock because the electricity is still on. There is a flash of discovery, a personal meeting between the reader and an unseen Spirit, a surge of power, a rebuke that reaches behind our stupid excuses, our pretenses and dishonesty, reaches in and wounds our pride where it hurts the most. The stories of persons who have been turned around, their whole lives revolutionized, by simply reading the Bible, are too numerous and too striking to shrug off. What the readers of the Bible through the generations have discovered, in short, is that the Bible is inspired. Paul may have said this first, but a great chorus of Bible readers agree with him. Now there is nothing magic about the Bible. Reading a few verses before going to bed, like a charm won't work. It's not the mechanical reading of the words that counts; it's humble contact with the truth within the words, that has transforming power.

Food for the man of God

The expression "man of God" is often used to describe a minister. But it should describe any Christian. If you aren't God's man, then whose are you? God's men and women are all who have the spirit of God and try sincerely to do what Jesus called the "weightier matters," justice, mercy, faith, the love of God. Such persons, whether children or grown persons, poor and obscure or gifted and influential, — all who desire to do God's will are missing a great source of spiritual health, missing the indispensable Book of "encouragement and hope" as Paul calls it elsewhere, if they do not study (not just read) God's Word. A Christian ignorant of his Bible is a shrunken, half-fed Christian robbing himself of the spiritual vitamins his spirit needs. The study of this book prepares a man of God for "every good work" For contact with the living God, for service to living men, there is no resource that takes the place of the Book wherein God speaks to all men.

For Publication Week of July 19

Now Is The Time . . .

To Get Livestock Handling Equipment

MAX SMITH

The county is well known for its cattle feeding production, we have over two thousand farms that fatten cattle and many of these have cattle twelve months of the year Many feeders are increasing the size of their operations and therefore have to handle more cattle They need proper handling equipment such as a small pen leading into a narrow chute, and at the end a head gate in which to restrain the animal Many animals may need individual treatment and these pieces of equipment will reduce the excitement and the amount of labor needed A loading chute is also very essential on livestock farms We call attention to these pieces of equipment as necessary for an efficient operation

To Inspect Self-Feeders

Many poultry, hog, and cattle producers continue to use self-feeding methods to reduce labor. The self-feeder must be built properly and adjusted correctly to let the feed down as it is needed, many feeders are guilty of wasting from 3 to 5 percent of the feed; this is poor management and should not be allowed. Check the feeders often to observe their operation and to notice any waste of feed.

To Not Forget the Heifers on Pasture . . . The months of July and August are often critical months in the dairy heifer raising program, this is the period that many heifers are away from the barn and the pasture might get too short If the heifers are to be expected to do their part in the milking line this fall or a year from now, it is important that they have plenty of forage and water during the hot summer months. In some cases, a hay rack may be needed in which good hay is placed several times each week. The important thing is not to forget them and to expect pasture grasses to provide all of the feed nutrients; many pastures will fall short of this demand during the hot, summer months.

(Continued on Page 11)

● Regional Contest

(Continued from Page 1)

Marietta R1, teamed up to win the livestock conservation division with a demonstration called "Shape Up and Ship Out"

John Frey, Quarryville R2, was the winner in the boy's public speaking contest He spoke on "How Much Education Do I Need?"

Other county entrants winning blue ribbons, but not qualifying for the state finals were Barbara Gockley, New Holland R1, Sara Roden, Ephrata R3 Both competed in the clothing selection division.

Earning red ribbons were Rebecca Kling, Mount Joy, and Linda Ney, Marietta R1, in clothing construction; and Gerald Wagner, Quarryville R2, horse division.

Presented with white ribbons were Robert Henry, New Providence R1, forestry, Dennis Allen, Quarryville R2, for poultry production; June Smoker, Gordonville R1, poultry foods, Daniel Rohrer, Manheim R1, and Pat Roberts, Mount Joy R1, tractor maintenance.

Show Building, and will be open to dairy breeders in the United States and Canada

His department, along with the Pennsylvania Farm Show Commission and the Pennsylvania Dairy and Allied Industries Association, again will be sponsor.

Cuthbert Nairn, Douglassville, PDAIA president, said dairy specialist at Penn State University, will be cattle superintendent, a position he filled in 1964 Shaffer will be ed in 1964 Shaeffer will be chairman of the rules committee, and will serve on the health and premium-catalog committees, both of which are headed by the show manager, Harold R. McCulloch, of State College.

With Shaffer on the rules committee are A. Reed Hayes, Bellville, Merle E. Miller, Carlisle, RD 3; Chester Raught, Doylestown; Howard Weiss, Myerstown, and Samuel G. Yoder, Shoemakersville, all dairy farmers.

Aides to Shaffer as cattle superintendent will be, by breeds Ayrshire, John H Holbert, Bedford, and Guernseys, Orville A. Yoder, Towanda, both county agricultural agents, Brown Swiss, Sidney Barnard, Holstein, Donald L Ace, Jersey, D N. Putnam, and Milking Shorthorn, Stephen B Spencer, all extension dairy specialists, the Pennsylvania State University.

BROKEN BIT CLUB

by Maurina Meier, reporter

The Broken Bit 4-H Light Horse and Pony Club met on Friday, July 16, at the leaders' home, Mr. and Mrs. Charles Risser, Stevens R1. There were 13 members present The group discussed their trip to see Monty Foreman, a great horse trainer, on September 17-19

The club had a guest from Ohio, Libie Holcomb, who told some things of her 4-H Club Miss Holcomb's hostess for her stay in Lancaster County was Janice Keeney of Neffsville The 4-H Roundup to be held at Glick's Show Ring on July 31 was also discussed

The group was given some horses to judge and was shown how to trim and groom a horse properly

The club officers are Ronnie Roether, president; Chuck Risser, vice-president, Maurina I Meier, secretary, Lois Enck, treasurer.

The next meeting will be held on Friday, August 20, and all future meetings will be on the third Friday of each month.

Soy Protein Approved As Binder In Meats

The U S Department of Agriculture has amended Federal meat inspection regulations to permit the use of isolated soy protein in sausage and certain other meat products USDA said the change will result in a broader selection of these products available to consumers

The amendment — which became effective on July 9 — was proposed in January by the Meat Inspection Division of the Consumer and Marketing Service

Division officials explained that various ingredients are used in certain processed meat products to bind the meat together At the present time, for example, consumers can select sausage with cereals added, or with dried milk products added

By permitting the use of isolated soy protein, additional product forms can be created, thus increasing the selection available to consumers.

In addition to sausage, the amendment permits the use of isolated soy protein in chili con carne, spaghetti with meat balls and similar products, pork with barbecue sauce, beef with barbecue sauce, and cheesefurters.

The amendment further requires that when isolated soy protein is used in these products, they must be marked and labeled accordingly.

New Handbook Views Bug-Killing Materials

A revised handbook that brings up to date U S Department of Agriculture suggestions for safe and effective use of insecticides against specific agricultural and household pests is now available.

Agriculture Handbook No 290, "Suggested Guide for the Use of Insecticides to Control Insects Affecting Crops, Livestock, and Households—1965," plants treated with certain chemicals

AH 290 advises that insecticides should always be applied so as to minimize hazards to beneficial insects such as again stresses the importance of following directions and heeding all precautions on insecticide-container labels.

Users are told of the necessity of applying insecticides properly in order to avoid harmful residues on or in food and feed crops and in livestock They are also urged to wear protective clothing and equipment as specified on the container labels and to take special care in handling honey bees, and to avoid adverse effects on fish and wildlife In order to aid state specialists in developing local use recommendations, insecticides are rated according to their toxicity to bees, warm-blooded animals, and selected species of fish.

Other information in the publication deals with protecting insect parasites and predators, effects of weather, plant, and animal conditions on insecticide treatment; calibrating insecticide application equipment; and the relationship of cultural, mechanical, and biological pest control methods to use of chemicals for insect control.

It is available for $1 from Supt of Documents, Gov't. Print. Office, Wash., D. C.

Max Maichele

P. L. Rohrer To Hold Corn Clinic

Farmers may have corn plants given a free tissue test at a clinic sponsored by P L. Rohrer & Bro , Inc. at Warehouse #2, Smoketown, Pa on Tuesday, July 27. Max Maichele, ORTHO Agronomist, will be present between the hours of 1-5 p m. and 6.30-8:30 p m to conduct the clinic

Corn growers are invited to bring freshly cut representative corn plants to the clinic where the agronomist will test them for nitrogen, phosphorus and potassium He will also interpret the results of the test and advise growers on any nutritional problems disclosed by the test

Growers are invited to bring a freshly cut corn plant from each of three areas they want tested The entire plant (with leaves attached) should be brought to the clinic There'll be no charge for testing three plants.

Tissue tests can indicate how well the fertilization program is meeting the needs of the corn crop Chemical tests have been developed which indicate the level of nitrogen, phosphorus and potassium in the tissue Using these tests, the agronomist can determine which, if any, nutrient is most limiting corn yields. By adjusting his fertilization program, based on the results of the tissue tests, a grower can provide a more balanced diet for his crop By providing nutrients that may be limiting yields, growers can realize greater yields and profits

Farm Women Group No. 3 Hold Picnic

The Society of Farm Women Group No 3 recently held their annual family picnic in Walters Grove, near Hopeland A baked ham dinner plus the regular picnic lunch was served to 85 people at noon

The program committee consisted of Mrs William Eberly, Mrs Adam Kopp, Mrs Rudy Shirk, Miss Ada Royer, Miss Marian Martin and Mrs Grace Weidman A short business session was conducted by Mrs Harry Usner, president

Plans were made to attend the annual county picnic to be held at Long Park on August 3

Games for the children were under the direction of Mrs Rudy Shirk, while the adult games were directed by Mrs William Eberly Several contests were won by Mrs Donald Graybill and Mrs Harold Stuber

The next meeting will be held August 21 at the home of Mrs Ivan Eberly, Ephrata R1, near Lincoln

Kettering Cow And Frey Herds Top May DHIA

The Red Rose Dairy Herd Improvement Association announced in its recent newsletter that a registered Holstein cow owned by Henry E. Kettering of Lititz R3, completed the highest 305-day lactation during May. "Jane" produced 21,417 lbs. milk and 832 lbs. butterfat with a 4.1 percent test.

The herds of Furry H. Frey, 1343 Gypsy Hill Rd., Lancaster, and J. Mowery Frey, Jr., Lancaster R7, were tied for the highest monthly butterfat average with 68 lbs. The Furry Frey herd recorded a milk production average of 1672 lbs , and the Mowery Frey herd 1614 lb.

Second high individual lactation was completed by "Carnot", a registered Holstein owned by Lloyd Wolf, Quarryville R2. She produced 19,332 lbs. of milk and 796 lbs. butterfat in 305 days

The registered Holstein herd of the Red Rose Research Center, 226 Pitney Rd., Lancaster, placed second in monthly butterfat production with an average of 1750 lbs. milk and 66 lbs. fat

Local Dealers Attend "Growing O" Field Day

Several dealers and their personnel attended the Oliver Corporation's new product field day recently at Hershey Farms, N. G. Hershey and Son, Inc., Manheim, was represented by Nelson H. Hershey, manager, with Ammon Shelly and Galen Hosler. Representing Farmersville Equipment Company, Inc. of Ephrata R2 were Ivan Nolt, president; Clydeth Buch, manager; Charles Hackman, salesman; Phares Musser, parts manager; Eugene Rutt, shop foreman; Joe Eberly and Chris Neff, servicemen; and Tom Buch.

The dealers viewed a wide range of products for the coming fall, winter, and spring seasons which were introduced. Many of these were demonstrated under actual field conditions.

The all-day field event was one of eleven such demonstrations being presented at principal agricultural and industrial centers during July, August and September.

Enforce the rule of no extra riders on farm machinery. Small children are often injured by machinery in driveways and work areas.

The wise farmer carries a fire extinguisher and first aid kit on tractors, trucks, and self-propelled machinery..

MILK PRODUCERS

Here Is Why It Pays To Use

GREEN PASTURES

Nutro-Sweet

1. **A Dairy Feed Product developed by our Nutrition Department to aid in maintaining milk production when roughage quality goes down.**
2. **It ECONOMICALLY replaces the nutrients you are missing when your pasture suffers from the dry weather.**
3. **VITAMIN A IS ALL IMPORTANT**
   So is Vitamin D. NUTRO-SWEET adequately replaces these essential vitamins which will not be found in a dry stemmy pasture or poor quality hay.
4. **MINERALS, especially phosphorous normally found in good roughage now supplied by NUTRO-SWEET.**
5. **In Short NUTRO-SWEET is a very economical source of nutrients.**
6. **A good top feed for heavier producers or show animals.**
7. **Cows really enjoy its bulky course texture.**
8. **Nutro-Sweet is palatable and a good appetite stimulant.**
9. **Saves hay for winter feeding.**
10. **Economical to use — saves money — 4 lbs. Nutro-Sweet equal to 6 lbs. of top quality hay or 8-10 lbs. good quality roughage.**

For better returns per feed dollar contact any Miller & Bushong Service Representative for an appointment with our Dairy Specialist, or call us direct at Lancaster 392-2145.

Farmers Inspect Feed Processing

4 STATE FARMERS VISIT

Dairymen and Beef Producers from Lancaster County, Eastern Pennsylvania, New York, New Jersey and Delaware visited Mr. and Mrs. Jesse Zeigler's, Wood-Lea-View Dairy Farm at Campbelltown, Pa, to see how they produce milk on home grown feed processed thru their two Harvestores.

Dairy Ration

Zeigler's dairy ration consists of free choice Harvestore processed haylage and one pound of Harvestore processed high moisture ground ear corn to four pounds of milk, plus free choice home mixed minerals.

Herd Health Improved

Zeigler told the visiting farmers, since he is on the Harvestore feeding program his herd health has greatly improved, his milk production is higher, butterfat is 3 to 4 points higher then it was when he fed baled hay, grain and dairy supplement mixture and corn silage.

Harvestore Builds A Future

Mr. Zeigler said, "We definitely recommend the Harvestore Feeding Program, because our Harvestores have not only put us on the road to success by giving us a year-round feeding program that lets us get top production from our home grown, Harvestore Processed Feeds, but is also helping us build a terrific future for our sons."

PART OF WOOD-LEA-VIEW Guernsey herd are shown reluctantly leaving the choice, Harvestore-processed, home-grown feed which is augered to the feed bunk at their favorite eating place. —Adv.

For the Farm Wife and Family

By Mrs. Richard C. Spence, Food Editor

SPENCE

"Take-It-Easy Cooking"

Here's an easy meal in a dish that's sure to become a family favorite. Butter Fried Pork and Cinnamon Apple Potatoes are definitely different and easy to prepare. For one thing, they're white potatoes, not sweet potatoes you often serve with apples. You brown the potatoes in butter, well-seasoned with cinnamon and nutmeg, for a brand-new flavor accent for butter-sauteed pork steaks. Apples go on top in the last minutes of cooking for a final flavor touch. It's a wonderful way to team some familiar foods for a brand-new family dinner.

BUTTER FRIED PORK 'N SPICED APPLE POTATOES

- 1 egg, beaten
- 1 tablespoon milk
- ½ cup bread or cracker crumbs
- 6 pork tenderloin slices
- ½ cup (1 stick) butter
- Salt and pepper
- 3 medium potatoes, peeled
- ½ teaspoon cinnamon
- ⅛ teaspoon nutmeg
- 1 apple, quartered, cored and sliced
- Parsley sprigs for garnish

In shallow bowl or pie plate mix together egg and milk. Dip pork slices in eggs, then coat with crumbs In skillet melt ¼ cup butter. Brown meat slowly on both sides, seasoning with salt and pepper. When meat is cooked thoroughly, remove to warm platter and place in preheated 250 degree oven Slice potatoes in half lengthwise, then cut halves into thin slices In skillet melt additional ¼ cup butter, add cinnamon and nutmeg Brown potatoes, turning occasionally; add more butter, if necessary When potatoes are tender, place apple slices on top Cover skillet and cook over low heat 5 minutes Pile potatoes and apples onto platter with pork slices and serve Garnish with sprigs of parsley, if desired. Makes 6 servings.

* * *

If you have a "hankering" for fish, try this easy Quick Savory Tuna Loaf. It serves 6 to 8 people.

QUICK SAVORY TUNA LOAF

- 2 6½ or 7-oz. cans, chunk style tuna, drained, flaked
- 2 eggs, slightly beaten
- 3 cups cornflakes
- 1 teaspoon grated lemon peel
- 2 tablespoons fresh lemon juice
- 1 1½-oz package meat loaf seasoning
- 1 10½-oz can white sauce (or 1¼ cups medium white sauce)

Lightly combine all ingredients in bowl, blending well. Pat into greased 9x5x3-inch loaf pan Bake at 375 degrees, 45 to 50 minutes. Good served with Creamed Peas or Creamed Spinach and a crisp green salad.

* * * *

Here's another spinach and tuna combination — in a tossed salad.

SPINACH AND TUNA TOSS

- ¾ cup olive oil
- ¼ cup tarragon vinegar
- 1 tablespoon lemon juice
- 1 teaspoon salt
- ½ teaspoon tarragon leaves
- ⅛ teaspoon ground black pepper
- 2 cups crisp spinach leaves, bite-size pieces
- 1 cup chicory, bite-size pieces
- 1 small Spanish onion, thinly sliced into rings
- ¼ pound mushrooms, thinly sliced
- 2 (7-oz.) cans tuna, chilled, drained and separated into chunks
- ½ pound Swiss cheese, cut into 2-inch strips

Combine first six ingredients in a covered jar. Shake and chill. Toss spinach and chicory in a large salad bowl. Arrange onion rings and sliced mushrooms around the sides. Heap tuna in the center; surround with cheese strips. Just before serving, shake salad dressing and toss with salad. Makes 1 cup salad dressing and 6 to 8 servings.

* * * *

Here is a golden gelatin salad chock-full of crisp, fresh vegetables. Sour cream and horseradish with a sprinkling of parsley make a savory, "snowy" frosting.

SUNNY GARDEN SALAD

- 2 (3-oz) packages lemon flavor gelatin
- 2 cups boiling water
- 1½ cups cold water
- 3 tablespoons lemon juice
- ½ teaspoon salt
- ½ teaspoon celery seed
- 1 cup cooked green beans, cut in 1-inch pieces
- 1 cup small cauliflowerets
- ½ cup shredded carrots
- ½ cup sliced celery
- ¼ cup sliced radishes
- ¼ cup sliced cucumber rounds, cut in half
- 2 tablespoons sliced green onions
- 1 cup commercial sour cream
- 1 teaspoon horseradish, drained
- 1 tablespoon finely chopped parsley

Dissolve gelatin in boiling water; add next four ingredients and stir well. Chill until the consistency of unbeaten egg whites. Stir in vegetables. Pour into 1½ quart ring mold. Chill until firm (about 4 hours). Unmold. Blend sour cream and horseradish; spread evenly over molded salad. Sprinkle with parsley. Serve to 8 people.

* * * *

There is nothing like a fresh citrus dessert to top off a summer meal.

TROPICAL FRUIT WHIP

- ½ cup cold milk
- 1 3¾-oz. package lemon whipped dessert mix
- 6 tablespoons cold water
- ½ teaspoon grated lemon peel
- 2 tablespoons lemon juice
- 3 oranges, peeled, cut into bite-size pieces
- 2 bananas, sliced
- ½ cup flaked coconut

Combine milk and dessert in small, deep bowl, blending well. Beat at highest speed of electric mixer 1 minute. Blend in water, lemon peel and lemon juice. Beat at high speed about 2 minutes. Fold in orange pieces, banana slices and coconut. Refrigerate at least one hour before serving.

HIGH 'N MIGHTY ORANGE PIE

Cookie Crumb Crust, 9-inch
½ cup sugar
3 eggs, separated
2 teaspoons grated orange peel
½ cup orange juice
3 tablespoons confectioners' sugar
1 cup heavy cream, whipped

Prepare your favorite crumb crust; cool. In 1-quart saucepan, combine ½ cup sugar with egg yolks, orange peel and juice Cook over low heat, stirring constantly, until mixture thickens and coats the spoon, about 5 minutes. Cool. Beat egg whites until foamy. Gradually beat in confectioners' sugar; continue beating until egg whites are stiff but not dry. Fold into cooked orange mixture; then fold in whipped cream. Lightly spoon filling into Cookie Crumb Crust. Freeze until firm. Remove from freezer a few minutes before serving. Garnish pie with fresh orange slices.

Any boy or girl between 9 and 19 years old can join 4-H.

Children's Clothing With Safety Features

If a child's clothing shows up against the background in which he is playing, you can see him more easily. Also motorists can see him easily. Outer garments of attention-attracting colors, such as yellow and red, can give this protection.

Fasteners, whatever kind they are, also need safety features Loosely sewn buttons can come off readily and a child can swallow one; broken buttons may bruise a child's body; and safety pins are a hazard — they may open if the child falls.

Although convenient in providing large neckline openings, drawstring necklines are not advisable for children's garments. Drawstrings become hard to manage when moist.

All trims and decorations must be firmly fastened so they won't catch onto corners of furniture or sharp edges of toys.

Because children by nature like to move around, to play, and to explore the world in which they live, choose clothing that is safe for their activities.

Some Things Worth Knowing About Split Dry Peas

Split dry peas help to fill out the creases of a slim meal Keep a few packages of dry peas on hand for soups and casseroles Store the packages in a tightly covered container where it's cool and dry.

It's easy to cook with split dry peas They require little or no soaking before cooking Read the label on the package for cooking directions You can combine split peas with a variety of foods, such as meats, poultry, cheese, and vegetables. You can mix cooked peas with ground meat for meat loaf or meat patties. Your favorite cookbook will give you specific recipes for using split dry peas.

Prepare Clothing for Coin-Operated Drycleaning

Before taking clothing to a coin-operated drycleaning establishment, prepare it for drycleaning just as the professional drycleaner does

Mend rips and tears; brush pockets, cuffs, and seams to remove loose soil and lint

Remove stubborn stains, such as paint, ink, dye, and food, with special solvents made to treat each kind of stain

Sort articles according to types of fabrics Separate woolens from silk and fabrics

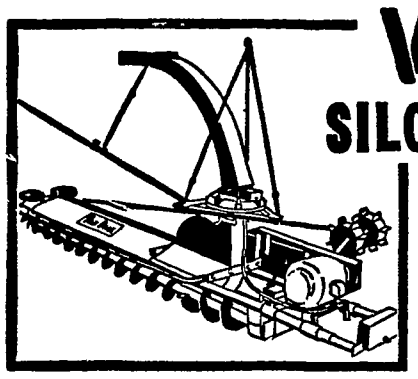
Complete automatic feeding for DAIRY COWS and CATTLE!

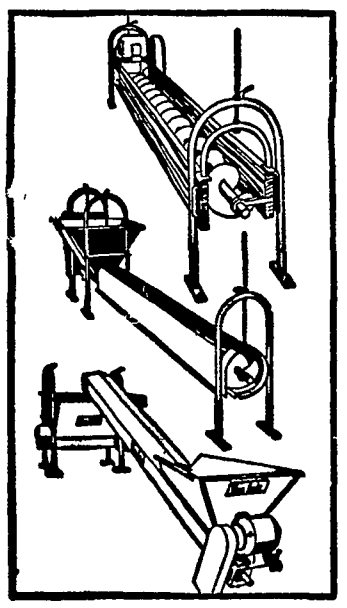


VanDale SILO UNLOADERS

Double augers deliver more silage per minute even when silage is deeply frozen . . . and at a lower operating cost. Patented V-paddle impellers *throw* . . . not blow . . . silage down chute. Adjustable drive hubs give positive traction in all types of silage.

Three-point suspension keeps unloader level at all times.

Plus a complete line of bunk feeders to meet your exact needs



Straight-out Auger Feeder

With VanDale units you can custom build the bunk feeding set-up to fit your needs. *Drive section includes hopper, drive assembly and 10', high capacity 9" auger.* Additional auger sections are in 10' units and are easily coupled.

Feed-R-Flo Bunk Feeder

The new, all-metal complete feeder. High capacity 9" auger rotates within tube. Gives all-weather protection, even feed distribution, and lower operating cost.

Conveyor Trough

An important link in automatic feeding. Positioned below silo chute, the VanDale conveyor trough carries the silage to the bunk feeder. Primary section includes hopper, drive assembly, and 10', 9" auger. Additional 10' auger sections may be added.

See us for modern automatic feeding equipment

● County Planning

(Continued from Page 1)

sion in housing would be in the greater Lancaster area, and in the northern and eastern parts of the county.

The big question that was in the minds of the district directors — future land use in the county effecting agriculture — has no answer at this time apparently. It is toward the goal of formulating such a plan that will serve the best interests of farming and the county that the planners and the conservationists hope to cooperate.

Harned pointed out that the factors that make Lancaster County desirable for agriculture — soil, climate, markets, level land — also make it desirable for building. The county and its general geographic location have been factors that encouraged industry to locate in the area. In recent times, Lancaster County has been known as one of the most prosperous counties in the nation. This has been due to the two partners, agriculture and industry. County Commissioner Chairman Ben Weaver, who was also present at the conference, commented on the "balance" of industry and residential influence in the townships and in the county He said this balance has enabled Lancaster County to enjoy one of the lowest tax rates of any county in southeastern Pennsylvania

Industrial growth, Harned observed, in general tends to follow the major transportation routes This has resulted in the many satellite areas which have developed around our boroughs

Unfortunately, much of the industrial and residential growth in the county has been in the areas of our best agricultural soils. The Lancaster Plain, so-called, which is a belt of limestone soil running east and west through the center of the county, has been an attractive site for homebuilders This has resulted in land values in these sections which are not realistic for farming.

Statistics show that farm population has declined in the county, but we still have a larger rural-farm population than any other county in the state, or in the nation as a whole. The planning director also pointed out three general trends for county agriculture: land in farms has decreased; total value of production has increased; production per acre has increased. In detailing these figures, he showed that farms below 180 acres had decreased in recent times, and those above 180 acres had increased in percentage of total farms in the county. While land in farms declined by 16,000 acres between 1954 and 1959, the average acres per farm increased from 62 7 to 68 4

Next month the SWCD directors will hold another joint meeting with the county planning commission and will attempt to outline reasonable goals and objectives for planning agricultural land use in the county. Planning presently is the only function of the Lancaster County Planning Commission, Harned emphasized. "Planning and zoning are not the same thing. Planning projects needs and land use for the future; zoning is the most feasible way to implement that plan," he stated.

LAMPETER-STRASBURG COOKS END SEASON

by Carol Groff, reporter.

The last meeting of the Lampeter-Strasburg 4-H Cooking Club was held at the home of Mrs. Robert Hess on Tuesday, July 20. At that time, the members made Carrots and Onions, and Baked Macaroni with Cheese.

A demonstration was given by Carol Hess and Doris Shenk on Tablesetting and Centerpiece.

On August 6 they will have their Roundup at Penn Manor. They will make Yeast Rolls.

RWOOD. BROWN SWISS NIOR MEMBER

Dale Edward Forwood of nheim, Pa., has recently en granted a Junior Membership in the Brown Swiss Cattle Breeders' Association of America. According to National Secretary Marvin L. Kruse of Beloit, Wis., junior memberships give boys or girls over ten years of age the privilege of registering offspring from Brown Swiss females, owned by them individually, at national membership rates until their 21st birthday.

Although the Brown Swiss Junior Memberhip program has only been in effect since January 1, 1965, over 250 boys and girls had been accepted as Junior Members by July 1.

● Now Is The Time

(Continued from Page 4)

To Practice Farm and Home Safety . . . Since the last week in July is Farm and Home Safety Week, we'd like to recognize the importance of this event in this column Safety is not a thing that you can put on and take off from day to day; it should be practiced at all times by every member of the family. In most cases haste and neglect are responsible for many accidents. We urge all farmers and homemakers to be on the alert for accident hazards and correct them at once; also to follow the safety instructions of machinery manufacturers, and take time to be safe.

GRANGE MEMBERS TO WORLD'S FAIR

Fulton Grange #66 held their regular meeting July 12 at Oakryn, Pa. Gyles Brown, Master, conducted the business meeting. The Charter was draped in memory of Samuel C. Heiney, a member for fifty-five years

The home economics committee served a fried chicken dinner to the Friendly Farmers July 3. This committee will be in charge of the annual picnic which will be held at the Grange Hall, July 26, 7 30 p m Tablecloth, iced tea, rolls and butter will be furnished. Members and friends are asked to bring a meat dish, another dish, plates, cups and silver. Francis Gillespie will show colored slides after the picnic.

The Youth Committee was in charge of a swim party and doggie roast at the Earle Gilbert farm near Rising Sun, Md., July 6. The Group went by bus from the Grange Hall.

Plans were made for the Grange women to houseclean the Grange Hall Wednesday, July 21, 9:30 a.m. They are asked to bring lunch and cleaning equipment.

The New York World's Fair Committee is taking two bus loads July 31, leaving Quarryville at 5 a.m. Reservations must be made by July 24 through Clair Murphy, Charles McSparran or Miss Dorothy Ackerman.

"All right! All right! So I'm going to move it out of their reach!"

TOM ZARTMAN poses with his home-raised Hereford steer, "Clyde". The steer will be shown as a senior yearling at the Ephrata Fair and at the Pennsylvania Livestock Exposition later this year.

L F Photo

● Zartman

(Continued from Page 1)

He is an honor student in vocational agriculture He is a member of the Key Club, a school service club He is active in the Cloister FFA Chapter, and was selected as Star Chapter Farmer this year Last year he won the area meat judging contest, and placed fourth this year He is vice president of his chapter and is a delegate to the county chapter Tom is also active in 4-H work He is vice-president of the Lincoln 4-H Community Club and participates in the 4-H hog shows

In his swine operation, Tom has six bred gilts which he bought at the Farm Show He also has a registered Berkshire boar which he raised, and expects to follow a cross-breeding program His sows are purebred Yorkshires, Duroes and Chester Whites, and each was crossed with the Berk boar Tom is a member of the Lancaster County Swine Producers Assn and several swine breed associations

When he builds his new, 32 sow farrowing house he plans to use block construction and incorporate such features as controlled environment slatted floors, and liquid manure handling He plans to invest about $3 500 in the building and equipment and supply his own labor

He is also raising a 17-month old Hereford steer named 'Clyde" which will be shown as a senior yearling at the Ephrata Fair and at the Pennsylvania Livestock Exposition Clyde was born on the farm in Mr Zartman's beef breeding herd Next year Tom plans to show seven or eight steers, covering more of the livestock shows

One of the interesting features of the Zartman farm is the small pond which is maintained primarily for fire protection, but is also stocked for fishing

● Citizenship

(Continued from Page 1)

annually by officials of the National 4-H Center in Washington D C to further citizenship education among the young people The group will spend some time touring our national monuments and edifices in Washington

The trip is paid for out of the Lancaster County 4-H Development Fund and members will leave the Lancaster area on Sunday, July 25, by chartered bus

John Milton used 8,000 different words in his poem "Paradise Lost."

Agway Members To Share Refund

Area farmers will be among Agway members in 12 states who will share in a $2,650,000 cash patronage refund announced this week.

The 1½ percent refund will apply on purchases of Agway commodities by members during the business year which ended June 30, according to Charles C Burgins, manager, Garden Spot Unit, Agway Inc

In a letter to members announcing the refund, Agway Executive Vice President Edmund H Fallon said it will bring to almost $6 000,000 the amount returned to members in the form of refunds, stock dividends, and interest on other Agway securities

Included in the total are two cash refunds paid to farmers enrolled in the Agway members health-life insurance plan $150,000 this June and $275,000 last December

Fallon said the patronage refund will be distributed to members late this fall.

Improved Alfalfa Meal For Hogs And Poultry

An improved dehydrated alfalfa meal, high in protein and low in fiber, has been developed as a feed for hogs and poultry, the U S Department of Agriculture reports

The new product, made by additional steps in the dehydration process, is also rich in carotene vitamins E and K, important growth accelerators, and in xanthophyll, the pigment that helps produce golden-colored broilers and bright-yellow egg yolks

The meal contains mostly leaves and small stems —approximately half of the alfalfa plant The remaining half, largely stems, is suitable as a feed for cattle and sheep, which utilize roughage well

The scientists say the new meal may be the answer to the feed industry's request for a higher quality commercial alfalfa meal for domestic and foreign markets.

The main commercial grade on the market has 17 percent protein and 27 percent fiber. With the new process, scientists say it is possible for industry to produce a meal containing 25 percent protein and not over 19 percent crude fiber

4-H Club News

LANDISVILLE-SALUNGA HOLDS FINAL MEETING

by Sue Mumma, reporter

The Landisville-Salunga 4-H Sewing Club held its final meeting for the year this week. The annual club picnic was set for August 16 at the Salunga Pavilion at 7 p.m.

Demonstrations were given at the meeting by: Laura Yoder—Hemming a skirt with seam tape; Sandy Newcomer —Sewing shank buttons; Jean Herr—Sewing a four-hole button; and Ann Roth—Knitting slippers.

Following the demonstrations, the members adjourned to work on their projects. The club will reorganize early next spring.

DRUMORE CLUB PLANS BARBECUE

by John Douts, reporter

The Drumore 4-H Club has planned a chicken barbecue for Saturday, July 31. It will be held at the Holtwood Athletic Field.

The Lions' Club will barbecue the chickens, and the club will buy and prepare the rest of the food. The barbecue will be served from 4 to 8 p.m. Tickets will be sold in advance and also may be obtained at the barbecue.

The menu will include: chicken, orange drink, bun, potato chips, pickles, carrot and celery sticks, apple sauce, and cake.

The profit from the event will be used for such 4-H Club purposes as entertainment and speakers for meetings, county council dues, sending representatives to 4-H Congress, and many others.

PEQUEA VALLEY CLUB

by Carol Ann Eby, reporter

The Pequea Valley 4-H Club met at the Intercourse Fire Hall on Monday, July 19.

During the meeting the cooking girls made Peach Shortcake They also judged the 4-H cake made by each member.

The other members worked on their sewing projects to be shown at roundup on August 18.

During the work session, light bulbs were distributed The members will sell these as part of the County 4-H Project.

JOLLY STITCHERS

by Jean Miller, reporter

The Jolly Stitchers 4-H Club of Farmersville met Monday, July 19, at the home of Mrs. Clydeth Buch.

Sharon Roden and Barbara Gockley gave a demonstration entitled "Color Capers" to the club.

Miss Richardson, an assistant from the county extension office, showed the club different types of zippers, and how to set one in a garment.

June White, Kaye Smith, and Jean Miller attended the 4-H county leadership class held at Manheim Junior High School on July 12.

Several members and leaders from the Jolly Stitchers Club attended Field Day recently at Long Park. Members of the club participated in the talent show given in the evening. They were: Barbara Gockley, who read a poem entitled "My Paradise"; Pat Smucker on her clarinet; Gail, Jane, Kaye, and Cindy Smith singing four songs.

4-H SEWING CLUB HAS DEMONSTRATIONS

by Barbara Hershey, reporter

Two demonstrations were given at the last meeting of the Lititz-Manheim 4-H sewing club.

The first demonstration was given by Shirley Weaver and Anna Ruth Long on how to put in a hem. The second one was given by Barbara Becker and Diane Palmer on good grooming.

The next meeting will be held on July 27, at Warwick High School, at 9 a.m.

4-H WILDLIFE CLUB TOURS ANIMAL TRAP

The Lancaster County 4-H Wildlife Club met Wednesday afternoon at the Animal Trap Co., Lititz, for a conducted tour, and then swam in the Lititz Community Pool. Refreshments and a meeting were held at Lititz Springs Park.

The group plans a trip to Camp Malcroft, Potter County, Aug. 6-8. They received an invitation for a joint session with the Lincoln 4-H Club.

The goal for eradicating hog cholera from the United States is 1972. Success of the eradication program will mean no more hog cholera—and no need to vaccinate against this deadly killer.

Mr. Dairyman:

Are you managing your herd for profit?

Managing for profit must begin with your dry cows and bred heifers.

Management for profit calls for feeding the dry cow and bred heifer to accomplish three things;

Build the unborn calf,

Build the cow's reserve,

Stimulate the cow's milk-producing system so that she may produce to her in-bred ability.

You can not expect last years top proformer to repeat only because she has the potential.

She has to be fed for high production — and particularly when she is dry.

No other period in a cow's life has as great an influence on milk production as does the two month period just before she freshens.

Management for profit must also begin with feeding your dry cows PIONEER DRY & FRESH.

On PIONEER DRY & FRESH and the PIONEER Program your dry cows get the nutrients they need, and you can be sure that she will produce according to her capability.

Stop in soon or ask our servicemen about the PIONEER management for profit program, beginning with your dry cows.

There is profit in PIONEER.

● Poultry Festival

(Continued from Page 1)

Forage Progress Days, August 27-28, and the State Plowing Contest, August 29.

Highlight of the festival will occur on Saturday, August 28, when the new Poultry Queen is crowned. The judges' choice will represent the state's poultry industry during the coming year, her public relations work including appearances on television and at various agricultural functions. Lucy Jane Frye of Pineville, Bucks County, is the reigning queen.

As many as 15,000 persons are expected to attend the statewide chicken barbecue on August 28, according to Paul Konhaus of Mechanicsburg, Penna, the festival's general chairman.

In addition, the festival will spotlight a display by the Pennsylvania Department of Agriculture, a waterfowl exhibit and pond, and "educated chickens" performing.

Commission On Food Marketing Recommends Agr. Market Changes

The head of the meats and poultry study for the National Commission on Food Marketing told several hundred cattle producers recently that emerging changes in the marketing of cattle and beef in the United States require agricultural analysts "to borrow some tools from analysts of industrial markets."

In a luncheon speech before the Third Coordinated Beef Improvement Conference of the American National Cattlemen's Association at Texas A & M University, Dr. Paul L Farris of the Commission staff said "the farmer's business is becoming increasingly interwoven with the business of the marketing system."

As nonfarm business and industry methods replace traditional marketing patterns of farmers, he added, "it will be more and more necessary to examine the various kinds and intricacies of market relationships among processing and distributing firms, and between these firms and farmers, in order to identify problems accurately and to set forth realistic alternative solutions in the agricultural economy."

Dr. Farris said that his study of the marketing of meats and poultry between farm gate and supermarket checkout counter shows that all Americans, and particularly farmers and consumers, are affected by the dramatic changes taking place in food marketing

Pointing out that forces causing these changes originate in the economy's marketing sector, Dr Farris explained

"Large scale organizations create new procurement and distribution patterns There are increasing pressures and incentives to standardize product quality and to gear large and regular volumes of supplies to particular market outlets

"We are unable to say what new forms or dimensions the system will include ' he went on. 'but the development of the marketing system for cattle and beef is not predetermined and can be shaped and guided by conscious effort

"I think it is safe to say," he added to the cattlemen, that the cattle industry does not intend to observe passively developments affecting it so profoundly."

Dr. Farris cited technological advances, such as computers and improved transportation, as leading to the elimination of some traditional marketing functions. He also said that it is increasingly important for a producer to have a specific sales outlet before making production decisions

"Without it, market uncertainties are too great. Once production is undertaken," he added, "a producer is relatively dependent on the selling arrangements he has made"

A fossil is defined as some evidence of plant or animal life preserved in rock

"Honey Queen" Girls To Register By Aug. 1

The Pennsylvania Beekeepers Association announces the 1965-1966 Pennsylvania Honey Queen Contest to girls between the ages of 17-22. The girl does not have to be a beekeeper but must be sponsored by a beekeeper, a 4-H Bee Club, a County Association, or a Commercial Beekeeper.

The contestant should register as soon as possible with the Chairman of the State Honey Queen Committee, Mrs. Edwin J Anderson, 307 South Garner Street, State College, Pa., who will furnish further details of the rules of the contest and the brochure to be prepared by each contestant.

The queen promotes the use of honey and makes appearances throughout the state on behalf of the honey industry

The present State Honey Queen, Miss Joyce Conklin, Milesburg, Pa., will crown the new queen at the Pennsylvania Beekeepers Annual Picnic at Cook's Forest, west of Tionesta, Pa. on August 21, 1965 All contestants, however, must be registered and have their brochures in the hands of Mrs. Anderson by August 1, the closing date set for the entries.

Sec. Bull Says Added Drought Relief Needed

Grain shortages on drought area farms emphasize an urgent need for added drought relief if "dairy and livestock operations are to survive," State Secretary of Agriculture Leland H. Bull declared this week.

Thirty-three counties have been granted hay and grazing privileges by the U.S. Department of Agriculture on diverted acres. "This added forage has been a real help, but these same farmers also urgently need feed grain," Secretary Bull declared. He added that any recommendation for feed grain by the state USDA disaster committee would get his immediate support.

Drought relief requests, he explained, originate within the counties and, if recommended by county and state disaster boards, are forwarded to Governor William W. Scranton for his approval and certification to USDA. Hay and gazing requests from eight additional counties have been certified by the Governor and are awaiting final action in Washington.

Feed grain relief makes Commodity Credit Corporation corn available to farmers at seventy-five per cent of market price Thirty-six Pennsylvania counties shared in this program over winter until June 15 because of 1964 drought-induced crop shortages.
